

## Business Analysis Management

**Length:** 1 Day

**Summary:** Business analysis is the discipline of identifying business needs and determining solutions to business problems. It is a process that requires input and participation from both business stakeholders and solution providers. In this course, you will explore the issues common in today's project environments. You will gain an understanding of the challenges faced in delivering effective solutions and strategies to effectively support the business analysis process.

**What you'll learn:**

- Business analysis and why it's important
- Role of the business analyst and how it differs from the role of the project manager
- Improve the business analysis process in your organization
- Best practices in business analysis
- Activities, tools, and techniques of business analysis
- Support the business analysts you manage

---
