

AutoCAD Customization

Length: 2 to 4 Days

Summary: This course will introduce the student to the various objects that can be customized within AutoCAD's graphical user interface. AutoCAD's macro language and DIESEL language will be applied to the ribbon, toolbars, tool palettes and other interface objects. Other customizable objects will also be covered. The course assumes familiarity and a comfort level with AutoCAD and will use the latest release of the software, however, backward compatibility will be discussed.
